FLOORING PRODUCT CATEGORIES

● NATURAL STONE TILES

- Granite
- Marble

● WOOD FLOORS

- Solid Wood Flooring (Hardwood)
- Engineered Wood Flooring
- Bamboo Flooring (Outdoor/Indoor)

● SYNTHETIC / VINYL

- SPC Flooring (Vinyl Plank-click to install)
- WPC/PVC Flooring

● TILES (note)

- Ceramic
- Porcelain

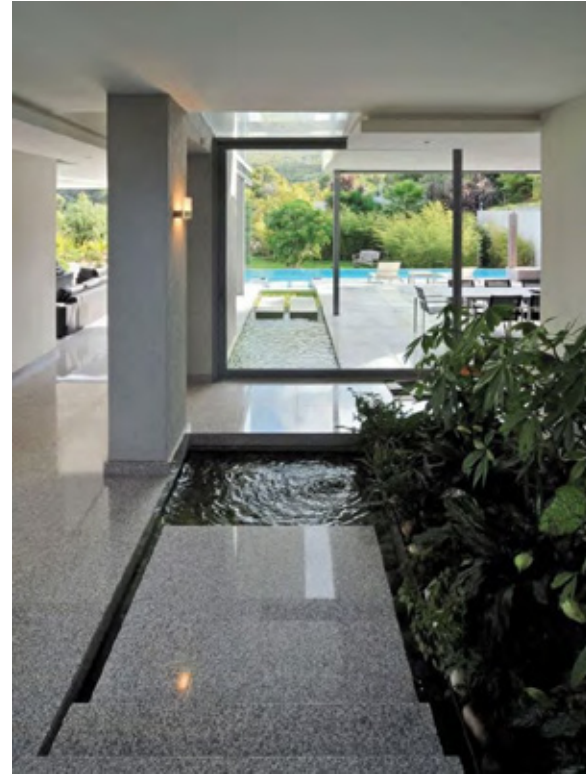

● Others

(note)

The major difference between porcelain tile and ceramic tile is how it's made. Both tiles are made from a clay mixture that's fired in a kiln, but **porcelain tile is made from more refined clay and it's fired at higher temperatures**. This makes it denser and more durable than ceramic tile.

SOLID WOOD FLOORING

Solid hardwood floors are made of planks milled from a single piece of timber. Solid hardwood floors were originally used for structural purposes, being installed perpendicular to the wooden support beams of a building known as joists or bearers.

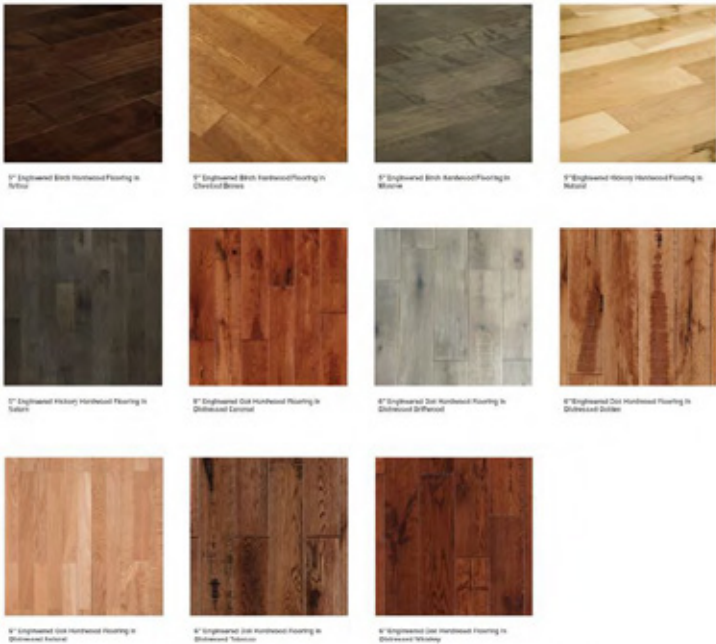

Available In

Size	3-3/4"x3/4"xRL	Size	5"x3/4"xRL
Sq.Ft. per Box	25.769016	Sq.Ft. per Box	22.6044
Size	4-4/5"x3/4"xRL	Size	6"x3/4"xRL
Sq.Ft. per Box	19.26756	Sq.Ft. per Box	27.12528

ENGINEERED WOOD FLOORING

Engineered wood flooring consists of two or more layers of wood adhered together to form a plank. Typically, engineered wood flooring uses a thin layer (lamella) of a more expensive wood bonded to a core constructed from cheaper wood. The increased stability of engineered wood is achieved by running each layer at a 90° angle to the layer above. This stability makes it a universal product that can be installed over all types of subfloors above, below or on grade. Engineered wood is the most common type of wood flooring.

Available In

Size	3/8" x 5" x RL	3/5" x 6" x RL
Sq.Ft. per Box	32.808672	27.12528
Veneer	1.2mm	3mm

BAMBOO OUTDOOR FLOORING

Bamboo has been used as an alternative for flooring because of its physical similarities to true hardwoods. Bamboo floor manufacturers and sellers promote its strength, durability, its eco-friendliness and its natural resistance to insects and moisture. The hardness of traditional bamboo flooring ranges from 1180 (carbonized horizontal) to around 1380 (natural), while newer manufacturing techniques including strand woven bamboo flooring range from 3000 to over 5000 using the JANKA hardness test, Other flooring materials have comparable JANKA ratings, with a higher number indicating a harder material: Red Oak (1290); White Oak (1360); Rock maple (1450); Hickory (1820); and Brazilian Cherry / JANKA (2350)

Outdoor Bamboo Flooring Surface Types	Mild Carbonization			Deep Carbonization
	Buff Color	Brown Color	Light Morphine	Deep Morphine

Available In

Size Length:1850/1860mm Width:137/139mm Height: 18/20/30/38 mm

BAMBOO INDOOR FLOORING

Bamboo Flooring Structure

Data of Bamboo Flooring

New design parquet floor bamboo from China	
1) Materials:	100% Raw Bamboo
2) Colours:	Carbonized/Natural
3) Moisture content:	8%-12%
4) Formaldehyde emission:	Up to E1 standard of Europe
5) Varnish:	Treffert
6) Coating:	13 coating finish ,3 top UV coating.
7) Glue	Dynea
8) Joint :	T&G System
9) Supply ability:	110,000m2 / month
10) Certificate:	CE Certification , ISO 9001:2008, ISO 14001:2004
11) Pecking:	Plastic films with carton box
12) Deliverly Time:	Within 25 days after received advance payment
13) Payment:	L/C at sight, or T/T (30% deposit in advanced)
14) Loading Port:	Shanghai
15) Installation	neil down or glue down
16) Warranty	Lifetime structure / 25 years of structural guarantee

Types of Bamboo Flooring

solid bamboo flooring

Bamboo flooring features: 27% harder than northern red oak. 13% harder than hard maple. Coated with durable aluminum oxide coating, it can be nailed, glued or floated.

Carbonized horizontal Natural horizontal Carbonized vertical Natural vertical

strand woven bamboo flooring

In terms of hardness, dimensional stability and flammability, it is better than most selected hardwoods and can be installed like other hardwood floors.

SPC VINYL FLOORING

SPC FLOORING

I. Brief Introduction

SPC is Stone plastic composite floor, a new developed eco-friendly floor. In European and American countries, SPC is also called RVP, that is, rigid vinyl plank. As soon SPC not only gathers most of the current flooring material, but also provides better performance of being water-proof, rigid, dimensionally stable, and relatively environmentally friendly. Thus it can be safely used in areas with sustained exposure to moisture, such as bathroom, laundry room and kitchen. With good rigidity, rigid vinyl provides a quieter, warmer vinyl flooring with a cushioned backing attached, thus eliminating the imperfections from the subfloor which is normally transferred through LVT.

Because of the perfect steady and durable performance, the SPC is very popular in developed countries such as European and American countries, Asia and Oceania countries. As soon SPC is suitable for home, hotel, hospital, and shopping mall, etc.

II. Features:

- Environmental protection:** 100% virgin material, zero formaldehyde, no radon or chemical.
- 100% Waterproof:** Vinyl material, hydrophobic, 100% water proof and damp proof.
- Durable:** High quality wear layer and UV coating surface, more than 10 years service life.
- Fire resistance:** Reaction to fire classification is Bfl-s1, second only to stone material.
- Slip resistance:** Special anti-slip treatment on wear layer, protect people safety.
- Sound barrier:** Around 20db, noise hardly caused while walking on the flooring.
- Anti-bacterial:** Most germ and bacterium can't survive.
- Easy to install:** easy to maintain, no need accessory for installation, no need special maintain.

IV. Technical Parameters

Product name	Design	Size	Thickness (mm)	Wear layer (mm)	Pieces/box	m ² /200*	
SPC (100% virgin)	Wood, Stone And Carpet	6" x 36"	4.0	0.3/0.5	18	3214	
			5.0	0.3/0.5	14	2760	
		7" x 48"	4.0	0.3/0.5	14	3214	
			5.0	0.3/0.5	12	2760	
		7.25" x 48"	4.0	0.3/0.5	13	3375	
			4.2	0.3/0.5	12	3214	
				5.0	0.3/0.5	10	2760

Customized sizes and models are available.

Size: 6" x 36", 7" x 48", 7.25" x 48", 12" x 24" or customized size

Thickness: 4.0mm-6.0mm

Wear layer: 0.3mm, 0.5mm, 3.0mm

Advantages: 0 formaldehyde, stain resistance, anti-slip, anti-bacterial, waterproof, mould proof, fire retardant, easy cleaning, and simple installation.

VI. Packing:

Packed in boxes and then on pallets, also we can produce the boxes according to our clients box design and photos. Each pallets are fixed with airbag inside the container.

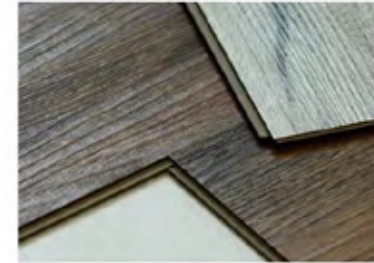

V. Colors and Designs (Popular colors).

3 patterns textures are ready for your choices: wood texture, carpet texture, stone/marble texture.

There are >1000 colors for the above the textures, and our regular stock colors are >300 designs. We also accept the customized color designs from the customers.

Surface Embossing: Plain Pattern, Light Embossing, Deep Embossing, Crystal, Hand scrape, Classic Stone, Peil structure, EIR, etc.

(1) Wood texture

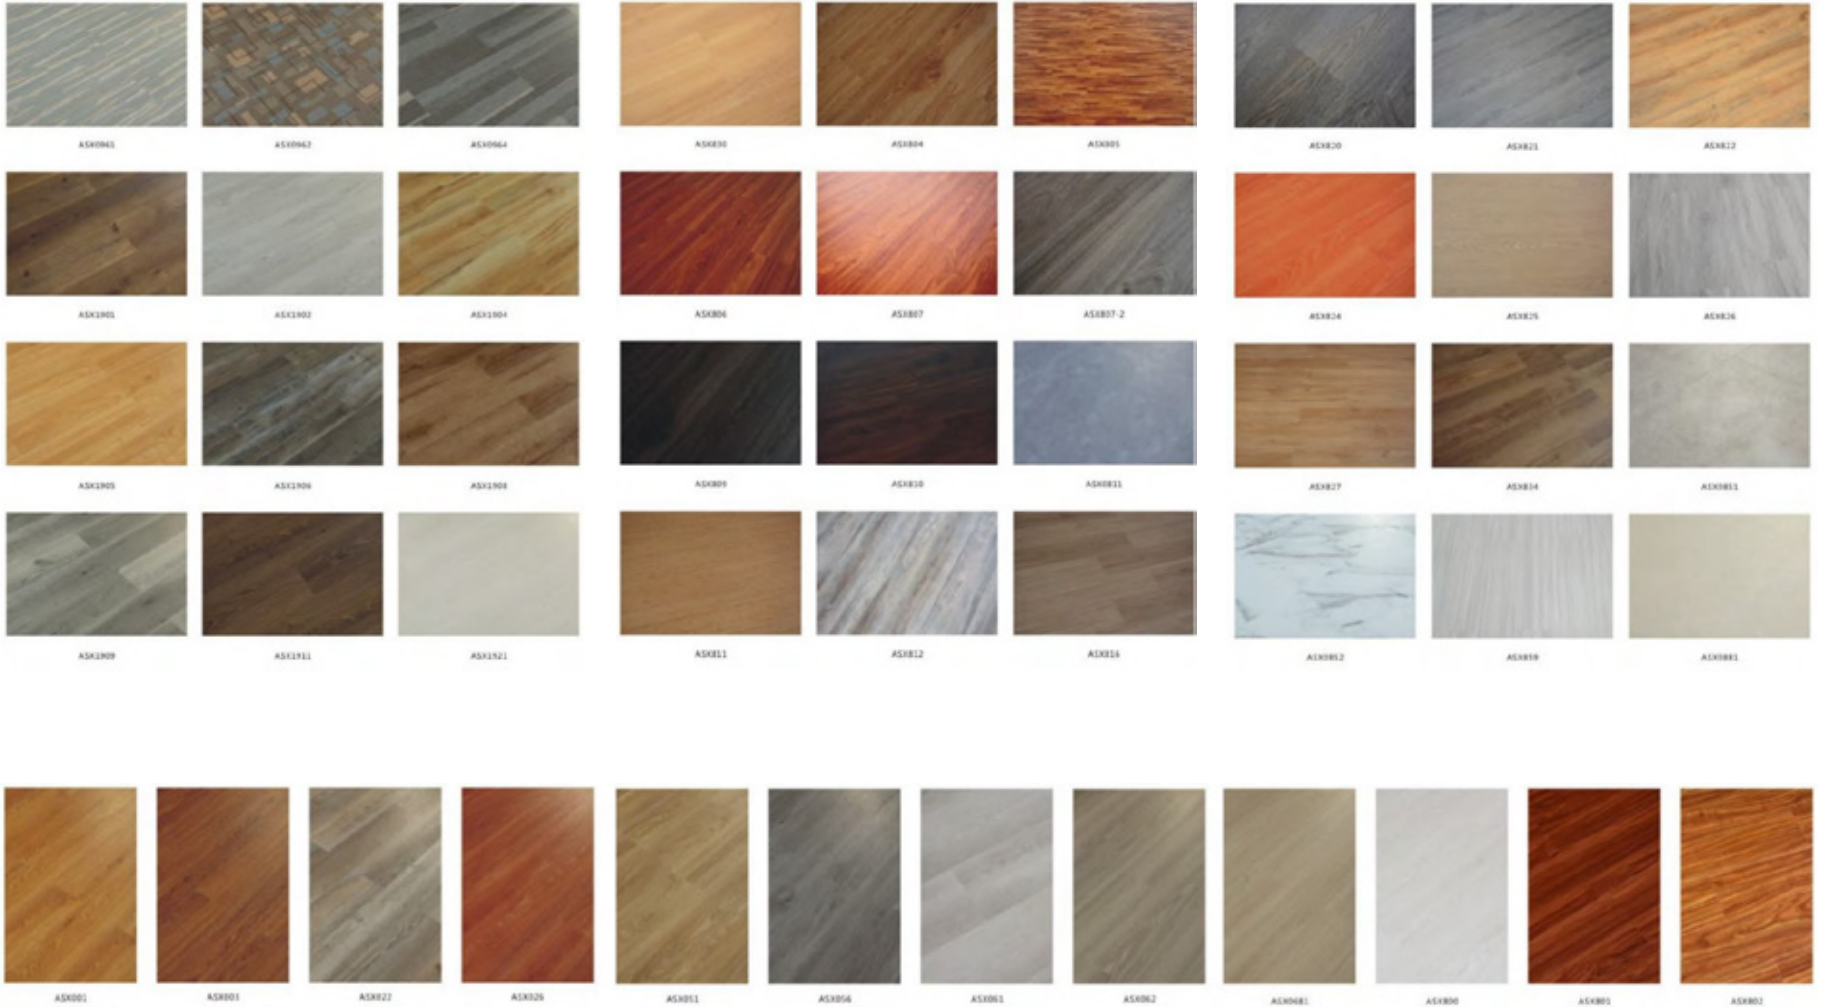

No breakage while loading

We use proper and necessary packing materials and technique, while packing of the flooring, blocking the pallets and even while loading/unloading the container. Whatever loading we do with or without pallets, we load them very professionally and mainly use fork-lift. We guarantee that there shall not be any breakage in the container loading.
